

## Business in Europe

BUSINESSEUROPE is the leading advocate for growth and competitiveness at European level, standing up for companies across the continent and campaigning on the issues that most influence their performance. A recognised social partner, we speak for all-sized enterprises in 34 European countries whose national business federations are our direct members.

## Policy committees and working groups

Organised by the seven main policy committees, and composed of experts nominated by the member federations, the working groups debate proposed EU legislation and come to a consensus view of the impact on enterprises of these proposals. The views are issued as official BUSINESSEUROPE position papers (about 100 every year), and it is the task of the permanent staff to ensure that these views are taken into account as legislation is decided.
